

MB ROLAND DISTILLERY

Kentucky Straight Corn Whiskey

A delicious corn whiskey created using locally grown, sweet white corn, pot distilled and bottled uncut and unfiltered at distillation & barrel proof.

MB Roland Kentucky Straight Corn Whiskey is like tasting summer in a bottle. Each sweet sip is the liquid version of biting into sweet corn on the cob, with notes of cake batter and corn pudding, honey and candy corn. Each batch is a combination of 5-10 barrels and usually proofs between 105-115 (52.5-57.5% ABV). Each bottle is hand labeled and numbered, with full transparency on the label. Enjoy neat, over ice, or with a splash of water.

Barrel Proof (52.5-57.5% ABV/105-115 Proof)
Available in 750 ML

NOTES:

MB Roland Distillery is Kentucky's first post-prohibition "grain to glass" craft distillery, located in Pembroke, Christian County. We take pride in making every product from scratch without the addition of GNS or "found" spirits. Locally grown food-grade white corn is used in each product, which we pick up from the granary located about 5 miles down the road from the distillery. The distillery was founded in 2009 by husband and wife team, Paul & Merry Beth (Roland) Tomaszewski.
